International Conference on Humanities and Higher Education: Generating Synergies between Science, Technology and Humanities

19-20th November 2018
CosmoCaixa Science Museum
Barcelona

WORKSHOP 6
Humanities towards a more equitable and democratic society

Joana Ferrer i Miquel
Doctor in Philosophy and Education Sciences
Graduated in Law
Education Department, Catalonia
Do you recognize the Guggenheim Museum in Bilbao?
San Marco in Venice two weeks ago

What can we find behind these images?
THE COMPLEXITY!
CHALLENGES!
What should be done at school and educational community, in order to make possible that the focus of learning is based on a concept of transversal knowledge and transversality skills?
• A concept of transversality knowledge that demonstrates not only the connection between subjects, but also poses solutions with contexts, local problematics and global issues that require integral/global answers.
• This milestone calls a transformation of the school. A transformation of school and educational community, with transformative agents, that put innovation at the service of this COPERNICAN TURN: a change that, based on an improvement, become a way to make a transformer.
Learning over the life

• Which are the aspects that need transversal knowledge to look for a real transformation in education?

• What do you have to take into account from the secondary school and the University?
SCIENTIFIC CREATIVITY

COMUNICATIVE KNOWLEDGE

ACTIVE KNOWLEDGE

SIGNIFICATIVE KNOWLEDGE

PROJECTIVE KNOWLEDGE
